

How to turn on and off your rechargeable hearing aids

To turn your rechargeable hearing aids on, press the button for 5 seconds and you will see a 2-second green blink from the LED light.

To turn your rechargeable hearing aids off, press the button for 5 seconds and you will see three 1-second green blinks from the LED light.

If your desktop charger is plugged into a power supply and turned on, inserting the hearing aids into the charger will automatically turn them off. Conversely, removing them from the charger will turn the hearing aids on.
